Lifetime limited Warranty

Budget Blinds Mfg. Ltd. warrants all products either manufactured or supplied through Budget Blinds Mfg. Ltd. for a period of one year at no cost to the original purchaser. (includes installation or shipping charges)

Products Manufactured by Budget Blinds Mfg. Ltd.

After one year, Budget Blinds Mfg. Ltd. warrants manufactured products against manufacturing defects either in materials or workmanship for as long as the original purchaser owns the product. All types of fabrics (includes pleated, roller or vertical) are warranted under normal use for a period of five years. We will warranty re-cording of pleated shades at no cost for materials or workmanship however, shipping or installation charges would apply if applicable.

Our warranty does not cover-

*improper installation, cleaning or maintenance
abuse
alterations
misuse
exposure to elements
excessive humidity, fading or discoloration over time*

In the case of multiple blinds in the same room, only the defective blind will be repaired.

Products Supplied by Budget Blinds Mfg. Ltd.

After one year, any products supplied by Budget Blinds Mfg. Ltd. will be warranted under the supplier's specific warranty.

Warranty requests must be accompanied by a proof of purchase.

Our warranty is covered by over 28 years of experience in the window coverings industry.

Sincerely,

Clement Latrance
President

ii) Measuring the Outside Mount

Measure and record the width and length.

Width for Outside Mount

Measure the width (C) of the area to be covered, where the headrail (mechanism that raises and lowers the blind or shade) will be installed. Consider how far you'd like the treatment to extend beyond the window frame on each side. Generally, the recommended overlap is at least 1 inches on each side of the window. For Roman and roll-up shades allow at least 2 inches on each side.

Record the desired width: _____ inches to the nearest 1/8".
Order this width.

Length for Outside Mount

Measure the length (D) in three different places: from the top right, top left, and top center of the window to the desired length (typically this is to the windowsill or floor). Use the longest measurement.

Add 3" for bracket installation above the opening/trim.

Record the desired length: _____ inches to the nearest 1/8".
